

Lotus Early Access — Privacy Notice

This notice covers data collected through the Lotus early access signup page.

1. Who we are

Lotus DeFi Labs, Inc. Privacy contact: security@lotuslabs.net.

2. What we collect

When you sign up:

- **Wallet address** and the **offchain signature** of your reservation message (the message includes your address, indicated commitment range, and a timestamp).
- **Indicated commitment range** — the range you select; non-binding.
- **Email address** — only if you check the notification opt-in.
- **Marketing preference** — whether you opted in to product updates.

When you use the page:

- **Usage analytics** — page and funnel events (page viewed, form started, wallet connected, commitment selected, signup submitted) via Segment, forwarded to Mixpanel. Event properties do not include your email or your full wallet address by policy.
- **Technical data** — IP address, device and browser information, collected by standard web infrastructure and the analytics providers.

Nothing is written onchain when you sign up. Your wallet address is public pseudonymous data by nature of the blockchain; the reservation signature itself is stored offchain by us.

3. Why we use it

- Administer early access: maintain the whitelist, gate the first deposit window, and enforce eligibility where required.
- Notify you (if you provided an email): window openings, closing reminders, material term changes.
- Offer an optional onboarding call for larger indicated commitments.
- Send product updates, only where you separately opted in.
- Understand signup funnel performance (aggregate analytics).
- Comply with law, including sanctions and eligibility restrictions.

4. Who we share it with

Service providers that process data for us: analytics (Segment, Mixpanel), email delivery, and signup storage. We do not sell personal data. We may disclose data where required by law.

5. Retention

Signup records are kept for the duration of the early access program and as long as needed for the purposes above. Email addresses are removed on unsubscribe or deletion request. Aggregate analytics are retained without personal identifiers.

6. Your choices and rights

- Sign up without an email — the wallet signature alone reserves your place.
- Unsubscribe from any email via its unsubscribe link; notification and marketing preferences are separate.
- Request access to, correction of, or deletion of your signup data at the privacy contact above. Depending on your jurisdiction you may have additional statutory rights.

7. Changes

This notice is effective from its publication on this page. Updates will be posted here; material changes will be notified to email signups.
